

I feel very strongly about commercial free radio. Half the things you hear on FM Radio / TV has nothing but Crime, Sex, Drugs, Murder, all offered in a pretty pink box. Pandora's Box that is. It's made for everyone to gently accept the idea that it's alright, when it's not. Im making this short and sweet because many other things require my time. People have the right to listen to whatever they want, instead of trying to take something harmless as commerical free radio (Any channel anyone can listen to), you need to look into the other sources as well.
